Android 9 devices. Android oneplus 9.

Security protections are built into every layer of your phone experience, so your device stays safe, fast and performs at its best. With monthly security updates* and Google Play Protect actively scans and verifies over 50 billion apps per day, and uses Google's machine learning to dynamically prevent viruses and malware. (Pocket-lint) - Android One? Android One? Android One was originally revert treat of the dessert names to make things clearer. So what, then, is Android One? Android One was originally revert treat of the dessert names to make things clearer. So what, then, is Android One? Android One was originally revert treat of the dessert names to make things clearer. So what, then, is Android One? Android One was originally revert treat of the dessert names to make things clearer. designed for first-time smartphone users in emerging markets. It was introduced at Google's I/O developer conference in 2014.- Original Android One front recently. Pocket-lintGoogle certification programmeOriginally conceived for entry-level devices in emerging marketsOffers a stock Android One - and labelled as such on the rear of the phone - brings with it a guarantee that it's a solid and stable version of Android that's not loaded with other apps, services and bloatware. Essentially, it's a stock Android experience. Android one comes without any of the stuff that manufacturers like to bundle in - no skins, no duplicate apps, no additional services. That means no pre-loading Microsoft Office or Facebook app, no additional news apps and no changing the keyboard. Google's goal here was to facilitate the spread of Google-controlled Android via compelling products. It's a little like the old Nexus programme, but rather than being devices sold by Google directly, these are Android devices made by other hardware partners. The biggest proponent of Android One is Nokia, who has a full portfolio of devices using the software. Pocket-lintNokia is the biggest partner to Android One which really put the scheme on the radar, with a full range of devices from the Nokia 5.3 through to the Nokia 9 PureView. Before shutting its mobile division, LG joined the list with the LG G7 One while the Xiaomi Mi A2 also runs on Android One is another example, launching a whole family of Android One phones, like the Moto One Vision. The thing we like about Android One is that it gives you a pure Android experience free from bloat - and some of these devices have been really fast to update to new versions of Android One site listing supported devices is still displaying phones from 2020 as the most recent, and several of the most recent Android 11 upgrade, when Android 0ne is described as "the purest form of Android." With it, you get "the best version of Android, right out of the box", according to Google.It's stock Android loaded with Google goodness, offering all the features of the core operating system. This is slightly different to the Pixel phones. When Google announces the Pixel phones it often includes a couple of unique features - such as a Pixel Camera or Pixel Launcher. In some cases these won't be available to the rest of Android and will remain unique to Pixel phones. You get Google Software like Google Play Protect, which helps ensure that your apps are secure and behaving as they should. What you won't get is some hijacked version of Android loaded with malware. Android loaded with malware are optimised for Google Assistant, so you can use Google's helper to hail a ride, text a friend, and do all the things you can do with Assistant on other devices. Go here to learn more about Google Assistant and how it works on mobile devices. It's a powerful service that keeps getting better all the time. With Android One, your device will receive up to two years of upgrades to the latest version of Android. That means that if you buy an Android One device on Oreo, you should end up with Android 10. You therefore don't need to endlessly wait for your device's manufacturer to roll out updates, as the manufacturer doesn't have much to do with the software. With an Android One device, manufacturers don't alter the software in at all, making it easy for Google to issue upgrades. In addition to all this, you get 3 years of Android monthly security updates. Or at least, that was the plan. As mentioned, the reality has been a little different in recent times. This one might sound odd, but Android One also offers support for hardware elements of a manufacturer's device. Android devices are so varied in form, the Android One programme allows the addition of some hardware features with the software to control them. For example, the HTC U11 Life added a squeezable frame so there's software support for that. You'll also get manufacturers own camera apps - the company who makes the phone doesn't have to use the basic Android camera, they can use their own. This might extend to support for Dolby Atmos on the speakers, as well as the camera - whatever camera hardware the manufacturer uses, they can support, using their own app. Apple iPhone 13 deals: Find out where you can find the best deals on the latest smartphones By Conor Allison · 16 June 2022 Find a low price on the Apple iPhone 13 Pro Max. As such, on a Nokia phone you'll find a Nokia camera with Pro modes and other stuff, different from the stock Android camera. That's just about all you need to know about Android One! Gesture navigation Redesigned app overview screen New look for quick settings Optional dark/light themes Digital Wellbeing Adaptive Brightness Adaptive Battery App Actions and Slices Improved notifications Improved Do Not Disturb mode A week after the official launch of Android 9 Pie, Google announced the Pie version of Android Go. The company claims it's even smaller, faster, and more secure than the Oreo version. The OS will free up even more space on smartphones, as shown in the image below: The Pie version of Android Go also offers faster boot times, security features like verified boot, and a dashboard for tracking data consumption. Google Pixel 2 XL Factory images OTA files Google Pixel 2 Factory images OTA files Google Pixel XL Factory images 9.0.0 (PPR1.180610.009, Aug 2018 9.0.0 (PPR1.180610.009, Aug 2018) 9.0.0 (PPR1.180610.009, Aug 2018 Telus) OTA files 9.0.0 (PPR1.180610.009, Aug 2018) 9.0.0 (PPR1.180610.009, Aug 2018, Telus) This year, the Android Pie rollout was a bit different from other major OS releases. Thanks to Google's efforts with Project Treble, seven other phone makers — Nokia, OnePlus, Oppo, Sony, Vivo, Xiaomi, and Essential — were able to enroll their smartphones in the Android Beta program alongside Pixels. A lot of these companies have already released Android Pie below. We're constantly updating this post as new updates are launched, so make sure you visit it frequently to stay up to date with all the latest. August 6, 2018 — Essential has always been extremely fast at issuing Android updates, and this release is no different. Minutes after Google announced Pie, Essential Phone quicker than our Pixels. Not bad!August 13, 2018 — Essential has announced via Twitter to announce that the Android Pie update started rolling out to Telus variants of the Essential Phone. August 6, 2018 — The company said in a statement that it looks forward to bringing Android Pie to the OnePlus 5, On Program. We're looking forward to bringing Android P to OnePlus 5/5T, and OnePlus 5/5T, and OnePlus 5/5T, and OnePlus devices. August 16, 2018 — According to XDA-Developers, unofficial AOSP ports of the latest Android version are already available for some OnePlus devices. These include the OnePlus 3 and 3T, as well as the older OnePlus 2. September 3, 2018 — The company has released the Open Beta 1 for the device. To try it out, click here to read instructions and get links to download the software. But before you do, keep in mind that as this is a beta update, some things — including Google Pay — won't work properly. And if you don't like the software and want to go back to the stable Oreo version of Android, you'll have to wipe your OnePlus 6 and then reinstall the OS — which means you'll lose all the data that's not backed up. September 7, 2018 — The manufacturer has released the Open Beta 2 for the OnePlus 6. The update brings Wi-Fi stability improvements, optimized background power consumption control, optimized multitasking UI, and more — see the entire changelog here. September 15, 2018 — OnePlus has released the Open Beta 3 for the Open Beta 3 for the Update adds the ability to launch Google Assistant or any other third-party assistant by pressing and holding the power button for 0.5 seconds. It also adds new functionally, the beta update brings with it stability fixes for the fingerprint sensor, face unlock, and ambient display. September 21, 2018 — OnePlus has released the stable version of the Android 9 Pie update for the OnePlus 6. It's a staged rollout, which means the update will be available for a limited number of users at first and will make its way to all OnePlus 6 device over the next few weeks. The rollout isn't based on regions — the update is instead randomly shipped out to a limited number of handsets.October 16, 2018 — The stable version of Android 9 Pie is now rolling out to OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weighs about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Pete Lau, one of the founders of OnePlus 6 devices in the U.K. The update weights about 1.5GB.October 14, 2018 — Peter OnePlus 6T's software will be different from the current version of Pie on the OnePlus 6. It will have some new gestures as well as "a whole new UI," according to the OxygenOS development team. Pete Lau also mentioned that while the OnePlus 3, 3T, 5, and 5T will still receive Android 9 Pie, the update is taking longer than expected. Unfortunately, he didn't share specific details on when it will be available. November 14, 2018 — OnePlus is rolling out the Android Pie beta for the OnePlus 5 and 5T to some users in China. The update is expected to make its way to more markets soon, although there's no word on when exactly that may happen. November 23, 2018 — OnePlus has announced on its forum that the Android Pie Open Beta for the OnePlus 5 and 5T is "almost out." That means it should be released soon, although a specific date was not mentioned. December 25, 2018 — The stable version of Android 9 Pie has started rolling out to the OnePlus 5T), gaming mode 3.0, a new Do Not Disturb mode, integrated Google Lens in the camera app, and the December 2018 security patches, among other things. February 28, 2019 — We have some good and bad news for OnePlus 3/3T owners. The good news is that, according to a OnePlus community manager, the Android Pie update for the phones is still coming. The bad news is that there's no word on when it will be released. April 5, 2019 — OnePlus has launched the first Android Pie beta update for the OnePlus 3/3T in China. There's no word on when it will be released. April 17, 2019 — Android 9 Pie is now available in other countries or when the stable version of the update will be released. April 17, 2019 — Android 9 Pie is now available in other countries or when the stable version of the update will be released. ```
Moto Z3, Verizon is finally rolling it out to the device. The update enables support for the 5G Moto Mod and includes the March 2019 security patch on board. April 2019 secur
Pie to the Moto G6 Play June 7, 2019 — According to users on XDA-Developers' forums, the Moto Z3 Play is receiving the Android Pie update in the U.S. The update includes the May security patch and comes in at around
1.5GB.July 25, 2019 — Verizon is rolling out Android Pie to the Moto Z2 Force. The update brings support for the 5G Moto Mod to the device. September 26, 2019 — According to XDA-Developers, Moto Z2 Play is now receiving an OTA update to Android Pie. August 21, 2018 — HMD Global promised back in May that all Android-running Nokia phones
will be updated to Android Pie. Chief Product Officer Juho Sarvikas now shared more details on the topic, confirming at a New Dehli event that the Nokia 7 Plus was part of the Android P beta scheme. August 31,
2018 — Responding to a user on Twitter, HMD Global executive Juho Sarvikas said that a camera-related update with "new experiences" is coming to the Nokia 8 with Android Pie. The update will be available. Hey let's not get carried away here?. We
already issued a camera update and you will shortly get another one with Pie with new experiences. Also ARcore support is there, 8., Etc... Facial unlock we haven't rolled out yet to our products as we are still evaluating solutions. — Juho Sarvikas) August 31, 2018September 12, 2018—The Nokia 7 Plus has received another beta Android
Pie update. The changes in the latest version appear to be minimal. The update apparently brings the September security patch, a non-removable "At a Glance" widget on the home screen, data arrows inside the Wi-Fi icon in the status bar, and support for the aptX Bluetooth codec to the device. The stable version of Pie is expected to hit the device
sometime this month. September 28, 2018 — Nokia has released the stable version of Android 9 Pie for the Nokia 7 Plus. The update comes in at around 1.4GB. October 9, 2018 — Looks like Nokia plans
on speeding things up a bit. The company shared more detailed info on its Pie update schedule (via Android Pie before the end of October. The previous plan was to release the update sometime in November. The Nokia 8 and 8 Sirocco will follow soon after, within the Nokia 7.1, 6.1 Plus, and 6.1 will get the stable version of Android Pie before the end of October.
the stable version of the OS expected to roll out to the devices in November. October 30, 2018 — Android 9 Pie has started rolling out to the Nokia 6.1, making it the second Nokia 6.1 to Android 9 Pie, the company started rolling out the update to the
Nokia 6.1 Plus. The next devices in line to get the latest version of Android are the Nokia 8 and 8 Sirocco. November 27, 2018 — Nokia 6.1 Plus. The next devices in line to get the latest version of Android are the Nokia 8 and 8 Sirocco. November 27, 2018 — Nokia 7.1. He also said it's a staged rollout, with some markets getting the update sooner than others. November 30, 2018 —
The Android Pie update for the Nokia 8 has been delayed for a couple of days. The original plan was to release it by the end of November. The news was announced by Nokia's CPO Juho Sarvikas on Twitter, who said there are a "few issues to address" before the update can go live. December 11, 2018 — Android Pie beta is now available for the Nokia
8. The stable version should be released soon, although a specific date was not announced. December 19, 2018 — The stable version of Android Pie is now available for the Nokia 8. However, some users note that the update is lacking features like Digital Wellbeing, Adaptive Battery, and App Actions. There's no word on when these will be added to the
device. Nokia's CPO Juho Sarvikas said the next phone in line to get the update is the Nokia 8 Sirocco. He didn't mention when we can expect to see it, though. December 27, 2018 — Nokia has kicked off the Android 9 Pie rollout for the Nokia 5.1 Plus. The update comes in at around 1.2GB and includes new system navigation functionality, Adaptive
 Battery, Adaptive Brightness, and "predictive application actions" — which sounds like a fancy name for Android Pie's App Actions feature. January 9, 2019 — It's finally here: Android 9 Pie is now rolling out to the Nokia 8 Sirocco. The update includes the December 2018 security patches and brings all the standard Pie goodies including Adaptive
Brightness, Adaptive Battery, and App Actions to the device. January 23, 2019 — Nokia 6 is scheduled for its Pie release a week or two later. The Nokia 5.1, 3.1, and 2.1 will begin receiving Android 9 Pie "in the next few days." The original 2017 Nokia 6 is scheduled for its Pie release a week or two later. The Nokia 5.1, 3.1, and 2.1 will
follow and should get the update by the end of this quarter (March 31). The Nokia 1 and Nokia 3 will be the last handsets to get Android 9 Pie update is now available for the Nokia 2.1. March 14, 2019 — HMD Global announced on Twitter that
Android 9 Pie is rolling out now to the budget Nokia 3.1 smartphone. June 3, 2019 — The Android 9 Pie update for the Nokia 3 has been released. June 25, 2019 — Android Pie to the Nokia 2 V phone, which is basically just a rebranded Nokia 2.1 that's
exclusive to the carrier. September 12, 2018 — MIUI 10 Open Beta firmware based on Android Pie is available for the Xiaomi Mi 8. The Mi Mix 2S and Xiaomi Mi 8. The Mix 2S and Xiaomi Mi 8. bootloader to install it using TWRP. You can find the download links for both ROMs in our dedicated post at the link. October 16, 2018 — According to XDA-Developers, the stable version of Android 9 Pie with MIUI 10 on top is now available for the Xiaomi Mix 2S. October 26, 2018 — Xiaomi has revealed the phones that will soon receive the Pie
update. These include the Mi 8 Screen Fingerprint Edition (known as the Pro model outside China), the Mi 8 SE, and the Mi Max 3, all of which are expected to get the latest version of Android by the end of the year. October 30, 2018 — Xiaomi has apparently released a closed beta build of Android Pie with MIUI 10 on top for the Pocophone F1 (via
XDA-Developers). The open beta is expected to be released by the end of November, while the stable version of the OS should start hitting devices before the year comes to an end. November 10, 2018 — Xiaomi has released the beta version of Android Pie for the Mi A2 smartphone, which is part of the Android One family — you can download it here
There's no word on when exactly the stable version will be available. November 16, 2018 — That was fast. Only six days after it released the beta Android Pie update for the Mi A2, Xiaomi started rolling out the stable version of the OS to the smartphone. November 18, 2018 — As expected, Xiaomi has released the open beta version of Android Pie for
the Pocophone F1. The software comes with the company's MIUI 10 skin on top — check out how to install it by reading our dedicated post. November 27, 2018 — According to a Google+ user, Xiaomi is
rolling out the Android Pie beta update to the Mi A1 smartphone. If true, it's possible that the stable rollout will begin by the end of the year, or very early 2019 at the latest. December 10, 2018 — Xiaomi is rolling out the stable version of Android Pie with MIUI 10 on top to the Pocophone F1. The update comes with the November security
patch.December 10, 2018 — According to multiple reports, Xiaomi is rolling out the stable version of Android Pie to the Mi A1 smartphone — less than a week after the beta version was released.December 21, 2018 — According to XDA-Developers, the MIUI 10 Global ROM based on Android Pie is now available for the Xiaomi Mi Mix 3. You can
 download it here.December 20, 2018 — Xiaomi is pushing another Android 9 Pie build to the Mi A1 phones. The stable version released on December 10 apparently caused quite a few issues regarding LTE connectivity for some users, and this update should hopefully fix that. However, some Reddit users are already complaining about missing LTE
bands, while others report receiving the update with no issues. February 20, 2019 — Owners of the Xiaomi Redmi Note 5 Pro and Redmi Note 5 Pro and Redmi Note 5 Pro and Redmi Note 6 Pro can sign up to test the beta version of Android Pie on their device. Slots are limited — find out everything you need to know here. February 22, 2019 — According to XDA-Developers, Xiaomi is rolling out
the stable version of Android 9 Pie to the Mi Max 3 and Mi 8 Lite in China. March 10, 2019 — XDA-Developers reports that Xiaomi is rolling out the stable version of Android Pie to the global variants of the Mi 8 Lite. May 6,
2019 — According to XDA-Developers, Xiaomi is rolling out the stable version of Android Pie with MIUI 10 on top to the Redmi Note 6 Pro. The update comes in at around 1.7GB.May 31, 2019 — Xiaomi is rolling out the Android 9 Pie update to the Redmi Note 6 Pro. The update comes in at around 1.7GB.May 31, 2019 — According to XDA-
Developers, Xiaomi is rolling out Android Pie to the global variants of the Xiaomi Mi 6. The update comes in at around 1.4GB.August 6, 2019 — Gadgets 360 reports that the Redmi 6 and Redmi 6A are now receiving
Android Pie in India. The updates come in at around 1.3GB each. September 17, 2019 — According to a Reddit thread, Xiaomi is rolling out the stable version of Android Pie to the Mi Box 3. The update comes in at around 650MB.
October 20, 2018 — Thanks to a teaser the company posted in the Samsung+ app (via Pocketnow), we have a better idea on when the Android Pie update will be available for devices such as the Galaxy S9. The teaser revealed that the latest version of the OS will start rolling out "early next year." Unfortunately, a more specific time frame was not
given. November 6, 2018 — Samsung has confirmed it will reveal the Android Pie beta software at its developer conference, which starts tomorrow (November 7) and ends a day later. The company is likely to launch the beta program for the
newest iteration of its Android skin called One UI — based on Android Pie — this November in the U.S., Germany, and Korea, followed by more countries in Europe and Asia in the future. The stable version of the software is expected to roll out to the Galaxy S9, S9 Plus, and Note 9 in January. November 9, 2018 — Samsung has confirmed to Android
Authority that its new One UI Android skin — based on Android Pie — will also come to the Samsung Galaxy S9, S9 Plus, and Note 9, which is expected to happen in January. November 15, 2018 — It's official! Samsung has kicked off the One UI
beta program for Galaxy S9 and S9 Plus owners. The program is currently available in the U.S., South Korea, and potentially a few other countries. You can check out how to sign up at the link. November 28, 2018 — Samsung has apparently opened up Android Pie beta registrations for the Galaxy Note 9 in the U.S. through the Samsung+ app.
However, the company then quickly pulled them. There's a chance the Pie beta registration notification in the app appeared by mistake — learn more here. December 4, 2018 — Samsung has informed Android Authority that Android 9 Pie One UI beta registrations for the Samsung Galaxy Note 9 are now open via the
Samsung + app. However, they are only available for the unlocked variant of the device (SM-N960U1). Registrations are limited, so you'll have to hurry up if you want to join the beta program. December 11, 2018 — Samsung is pushing out a new update to all Samsung Galaxy Note 9 owners beta testing Android 9 Pie. The update has the December
2018 security patch on board along with bug fixes related to things like Night Mode and Samsung Pass — learn more here. December 24, 2018 — Samsung decided to speed things up and is now rolling out the stable version of Android Pie with One UI on top to the Galaxy S9 and S9 Plus. The update is currently available in Germany, but it should
make its way to other markets soon. It comes in at around 1.7GB.December 24, 2018 — Samsung has updated the Members app with its Android 9 Pie update roadmap, revealing which devices will get the latest version of the OS and when. The Galaxy S9 and S9 Plus will receive Android 9 Pie in January 2019. Even though the update is rolling out to
the phones starting today, the carrier variants might not see it for another month. The next phone on the list is the Galaxy Note 9, which looks to receive the Android 9 Pie — along with One UI — in March 2019. The
update roadmap also reveals that the Android 9 Pie rollout is expected to go from April 2019 with Samsung's Galaxy A8 Star — learn more here. January 2, 2019
— Samsung has already changed its Android Pie update even sooner. There are also a few new devices, like the Galaxy Note 9 and Note 8, are now expected to get the update even sooner. There are also a few new devices on the list including the Galaxy J8. However, some Samsung phones — like the Galaxy A8 (2018 model) —
 were removed from the list, which means they aren't expected to get the Pie update anymore. You can check out the entire list below: Galaxy S8 (March 2019) Galaxy S8 (March 2019) Galaxy S8+ (March 2019) Galaxy S9+ (January 2019) Galaxy S9 (Januar
2019) Galaxy A6+ (April 2019) Galaxy A7 2018 (April 2019) Galaxy A8 Star (April 2019) Galaxy J2 (2018) (April 2019) Galaxy J4 (April 2019) Galaxy J8 (May 2019) Galaxy J8 (May 2019)
Galaxy J7 2017 (July 2019) Galaxy J7 Duo (July 2019) Galaxy Tab A 10.5 (October 2019) Galaxy Tab A 2017 (October 2019) Galaxy Tab A 2017 (October 2019) Galaxy Tab A 2017 (October 2019) Galaxy Tab Samsung is rolling out the stable version of Android Pie with One UI on top to the Galaxy Note 9. The update has been released Germany for the
Exynos chipset variant, but there's a chance it's being deployed in other regions as well. January 12, 2019 — After rolling out the update in Malaysia as well. The latest version of the OS should make its way to all Galaxy S9 and S9 Plus handsets globally by
the end of the month. January 12, 2019 — After Germany, the stable version of Android 9 Pie for the Galaxy Note 9 may be delayed.
The update started rolling out in Germany two weeks ago, and in the UAE a couple of days ago, suggesting this was the start of its major rollout. However, this may not be the case, as Samsung's Turkish portal Guncelmiyiz indicates the update will instead roll out from February 1. Initially, it was expected that all Note 9 devices globally will get Pie by
the end of January. Nothing has been confirmed yet, so things can still go either way, January 15, 2019 — The beta version of Android 9 Pie is now available for the Galaxy Note 8. To try it out, open the Samsung Members app and accept the invitation for the beta program. Once you are in, you'll receive the update that's around 1.8GB in size. January
16, 2019 — According to The Mobile Indian, Samsung is rolling out Android Pie to the Galaxy S9, S9 Plus, and Note 9 in India and possibly a few other countries including South Korea
and the U.K. You can sign up via the Samsung Members app. January 18, 2019 — The Wi-Fi Alliance has certified the Galaxy A7, A8, and A9 (2018) for Android platform update. However, these devices will not get the One UI overlay, as that
will only make its way to the Galaxy S8 and S8 Plus, Note 8, S9 and S9 Plus, and Note 9. January 24, 2019 — Samsung is now rolling out the second Android Pie beta update to the Galaxy Note 8. It comes in at around 700MB and addresses a number of issues including the camera app crashing when using slow motion or super slow motion. However,
some bugs from the first beta have not been fixed with this update — learn more here.
